

Spill Containment  
on Water

## INFLATABLE OIL BOOM

The Chatoyer Inflatable Oil Boom is a light weight containment boom suitable for oil response activities in sheltered waters, rivers and harbours. This boom is designed for quick deployment across emergency situations and is simple to use. Fabricated from high visibility, abrasion resistant material with high strength, fusion welded seams. Each boom section has multiple air chambers to provide redundancy and ensure reliable operation.

Inflatable boom is ideal for convenient storage on reels or within individual bags. These storage systems allow for ease of transport and rapid deployment in an emergency. Chatoyer Inflatable Boom is available in 4 varying heights to suit different environments and response requirements.

### APPLICATIONS

---

- Ponds and lagoons
- Rivers
- Marinas
- Harbours
- Offshore

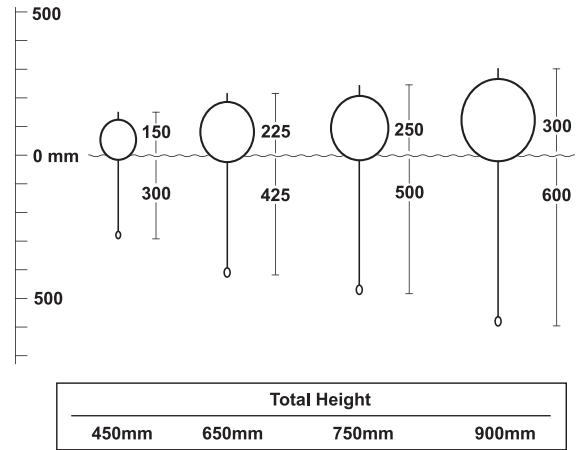

# CHATOYER

# INFLATABLE OIL BOOM
