

30L OIL & FUEL FLEET SPILL KIT BAG

SpilMax® Fleet Kit Bag is made of flexible and robust PVC material. Its buckle doubles as a strong carry handle and security feature to keep the absorbents dry. The roll-top sack is easy to use. Fold the top three times and seal it with the buckle.

The absorbents in the Oil & Fuel Spill Kit are hydrophobic and designed to absorb a wide variety of plant and seed oils, hydrocarbons, petrochemicals, and petroleum-based solvents, making it ideal for use in various industries, including automotive, manufacturing, construction, and agriculture.

They are perfect for use in wet work environments or oil-on-water spills, preventing further contamination and making it easy to clean up spills quickly and effectively. Additionally, spill kit instructions are located on the outside of the bag, providing easy reference in emergency situations.

SPILL KIT	TOTAL WEIGHT	DIMENSIONS	REFILL
