

Australian made, biodegradable SpilMax® Natura-Sorb Floor Sweep is made from organic wood and cellulose fibres which are treated, pelletised and processed to provide a granulated floor sweep. Its granular texture offers effective weight for easier application and prevents excess dust.

Natura-Sorb absorbs more liquid than clay or kitty litter products and is an environmentally friendly option. Because the chemicals are encapsulated and will not leach out into the environment, this floor sweep meets the EPA criteria for disposal at land fill. Always check local disposal regulations.

Natura-Sorb is designed for spills requiring rapid absorption and full encapsulation. It can be

used to clean up hydrocarbon and water based liquids. This product is not suitable for corrosive or highly oxidising agents.

This floor sweep is ideal for industrial workplaces, high volume land based spill response, transport companies, utilities, infrastructure & road works and workshops.

### TESTING:

USEPA Paint filter test 9095A

CODE	WEIGHT	DIMENSIONS
CH2000	10 kg	0.65mL x 0.50mW x 0.05mH
CH1998	5 kg	0.65mL x 0.50mW x 0.10mH
