

GEOTEXTILE SILT SOCKS

Silt and Sediment Control

Silt socks are a cost effective, temporary solution to control water movement, minimise site wetness and reduce soil erosion.

Efficient and versatile, Silt Socks can be strategically arranged on-site to manage stormwater flow requirements effectively. Their primary function is to prevent the entry of silt and sediment into waterways, providing an adaptable solution for sediment control.

FEATURES

- ✓ 260gsm nonwoven geotextile
- ✓ UV stabilised
- ✓ Heavy Duty Material
- ✓ Robust Construction
- ✓ Excellent Filtering Capability

Product	Code	Length	Diameter
Geotextile Silt Socks - Box of 100	CHGSS01	1m	150mm
Geotextile Silt Socks - Pack of 2	CHGSS04	50m	150mm

EROSION PRINCIPLE

Whenever reasonable and practical, priority needs to be given to preventing, or at least minimising soil erosion rather than allowing the erosion to occur and trying to trap the resulting sediment.
