

SOLID FILLED OIL CONTAINMENT BOOM

Spill Containment on Water

STORES COMPACTLY AND DEPLOYS QUICKLY

The Solid Filled Containment Boom serves as an impermeable barrier specifically crafted to deflect or contain spills and floating debris effectively. Notably resilient in adverse weather conditions, these booms are suitable for deployment over short or extended periods in harbours, rivers, ponds, dams, and other open waterways.

| Product | Code | Length | Height | Freeboard | Draft |
|-----------------------------------|---------|--------|--------|-----------|-------|
