IBC AND SPILL PALLET COVER

Bags and Covers

COVERS SERVE AS CRUCIAL ADDITIONS TO YOUR BUNDED PALLETS AND IBCS.

- Covers are a great way to protect the contents under the cover from light exposure.
- By covering the bunded pallet you keep rainwater out and maintain compliant bunding capacity.
- Leaks from punctures will be contained by the PVC cover and directed down into the sump of your bunded pallet.

| Product | Code | Length | Width | Height |
|-------------------------------|---------|--------|-------|--------|
