

Flood Barrier

Water Diversion

RAPID, REUSABLE FLOOD PROTECTION FOR ANY TERRAIN

Chatoyer Flood Barrier is a modular, self-locking dam made from a heavy duty PVC. It deploys in under 5 minutes with no tools, requiring only 2 people. Built-in ballast stabilises the barrier using water weight. It suits all ground types without anchoring, is reusable, and stores long-term without loss of performance.

| Product Code | Length | Height |
|--------------|--------|--------|
| CHFCB01 | 15m | 700mm |

| Specification | Value |
|---------------------|-------------------------------------|
| Fabric | Heavy Duty Hi-Vis Yellow 900gsm PVC |
| Ballast | 15mm SS316 Plate |
| Chemical Resistant | Yes |
| UV Resistant | Yes |
| Corrosion Resistant | Yes |

APPLICATION

- Suitable for proactive emergency flood response
- Industrial sites near water-sensitive infrastructure
- Construction zones requiring temporary water diversion
- Stormwater channels and drains
- Riverbanks and creek crossings
- Coastal areas during tidal surges
- Agricultural land to protect crops or redirect water
- Residential zones for property protection during heavy rain

DISCLAIMER: Chatoyer is not responsible for any product malfunctions, damage, or performance issues resulting from misuse, unauthorised modifications, improper installation, external environmental factors, or failure to follow recommended usage guidelines. This includes, but is not limited to, damage caused by accidents, natural disasters, power surges, or use with incompatible accessories. All warranties and support services apply only to products used in accordance with the manufacturer's instructions and within the intended operating conditions.
