

Geotextile Silt Sock

Silt and Sediment Control

FILTER, DIVERT AND STABILISE WITH GEOTEXTILE SILT SOCKS

Geotextile Silt Socks are a cost-effective, temporary measure for managing stormwater and reducing erosion. Made from 260gsm UV-stabilised nonwoven geotextile, they offer excellent filtration and durability. Unfilled and easy to position, they help divert sediment-laden water into traps and prevent silt from entering waterways. Suitable for various site conditions.
