

## Ultra-Filter-Tex

Spill Control

### VERSATILE USE IN STORMWATER MANAGEMENT AND SPILL RESPONSE

Ultra-Filter-Tex is a durable geotextile engineered to absorb oils and greases while allowing water to pass freely. Manufactured from recycled synthetic fibres, it selectively retains hydrocarbons without releasing them back into the water, making it ideal for stormwater treatment, spill clean-up and oil/water separation. Lightweight, reusable and environmentally benign, it delivers reliable performance in demanding land and marine environments.

Product Code	Description	Length	Width	Weight
CHU9310	Ultra-Filter-Tex	76m	1.5m	57kg

Specifications	
Material	Nonwoven Geotextile made from recycled synthetic fibres
Colour	Grey
Mass Per Unit Area	460gsm
Absorption Capacity	6.70 L/m <sup>2</sup>
Flow Rate	60 l/m <sup>2</sup> /sec
Oil Recovery	85–90% reclaimable
Puncture Resistance	32kg
Pore Size	100 microns

### APPLICATION

- Stormwater and wastewater filtration
- Oil spill clean-up (shorelines, surf zones)
- Oil booms, blankets and spill fences
- Track matting and industrial maintenance areas

**DISCLAIMER:** Chatoyer is not responsible for any product malfunctions, damage, or performance issues resulting from misuse, unauthorised modifications, improper installation, external environmental factors, or failure to follow recommended usage guidelines. This includes, but is not limited to, damage caused by accidents, natural disasters, power surges, or use with incompatible accessories. All warranties and support services apply only to products used in accordance with the manufacturer's instructions and within the intended operating conditions.
