

## Ultra-Self Bailer®

Spill Containment on Land

### SAFE BUND DRAINAGE WITH HYDROCARBON CONTROL

Rainwater can reduce spill bund capacity outdoors. The Ultra-Bund Accessories Self-Bailer solves this by allowing clean water to drain while capturing hydrocarbons. It fits most containment units via bulkhead fitting and seals off automatically during large or concentrated spill. Built from corrosion-resistant PVC, it's ideal for unmonitored sites. Includes manual shut-off for maintenance and easy filter replacement. A reliable solution for compliant outdoor spill control.

Product Code	Product Description	Length	Width	Height	Capacity
CHU9935	Ultra-Self Bailer Standard PVC	700mm	80mm	80mm	0.4L
CHU9937	Ultra-Self Bailer Large PVC	910mm	110mm	110mm	0.8L

### ULTRA-SELF BAILER REPLACEMENT FILTERS

Product Code	Product Description	Length	Width	Height
CHU9936	Ultra-Self Bailer Standard Replacement Filters, 2 Pack PVC	350mm	200mm	120mm
CHU9938	Ultra-Self Bailer Large Replacement Filter, PVC	400mm	150mm	150mm

Specifications	
Material Type	PVC Hydrocarbon Polymer and Activated Carbon
Flow Rate	28L
UV Resistant	Yes
Includes	1 Passive Filter Canister 1 PVC pipe connections with manual shut off

### APPLICATION

- Outdoor Spill Containment Systems
- Fuel and Chemical Storage Sites
- Construction and Mining Sites
- Transport and Logistics Facilities
- Stormwater Management in Industrial Zones
