

Ultra-Drain Guard Trash and Debris

Stormwater Protection

MICROPLASTIC AND DEBRIS CAPTURE FOR STORMWATER PROTECTION

Ultra-Drain Guard Trash & Debris Model is a stormwater insert designed to capture plastic pellets, microplastics and floatable debris before they enter drainage systems. Manufactured from needle-punched geotextile, it delivers high-efficiency filtration while integrated overflow ports maintain drainage during heavy rainfall, supporting environmental compliance at industrial sites.

Product Code	Description	Length	Width	Height
CHU9229	Drain Guard Trash and Debris	1.2m	0.9m	0.4m

Specifications	
Retention Capacity	28L per unit
Fabric Material	Needle-punched geotextile
Captured Contaminants	Microplastics ("nurdles"), leaves, debris, sediment, hydrocarbons
Sediment Removal Efficiency	Exceeds 80%
Flow Rate	60L/m ² /sec

APPLICATION

- Plastic manufacturing and processing plants
- Industrial and logistics facilities
- Construction sites
- Car parks and transport depots
- Any site with risk of microplastic or sediment runoff

DISCLAIMER: Chatoyer is not responsible for any product malfunctions, damage, or performance issues resulting from misuse, unauthorised modifications, improper installation, external environmental factors, or failure to follow recommended usage guidelines. This includes, but is not limited to, damage caused by accidents, natural disasters, power surges, or use with incompatible accessories. All warranties and support services apply only to products used in accordance with the manufacturer's instructions and within the intended operating conditions.
